

From insight through execution, Cadvabglobal works with you to design and implement operational strategies and capabilities that help you gain and sustain a competitive advantage. We bring extensive years of management experience to help you improve profitability and ensure excellent customer service. Our business solution services include:

Strategic Planning

Cadvabglobal's experienced business consultants will provide advice to executives about the best way to carry out their organization's core priorities. In order to guide you we will examine and summarize your organization using tools such as SWOT analysis to analyze strengths, weaknesses, opportunities and threats. Armed with that information, our consultant facilitates the highest level of management in choosing the course of action that would lead to the best future for the organization. It is the responsibilities of our business consultants to provide the planning framework and facilitate a meeting which may take place over the course of several days, at an off-site retreat location to ensure results.

Business Process Re-engineering (BPR)

A procedure that involves the fundamental rethinking and radical redesign of business processes to achieve dramatic organizational improvements in such critical measures of performance as cost, quality, service and speed. Our BPR consultants will work with your organization to

streamline its work processes in a way that make sense for your IT systems and staff, and encourage innovation, helping you to enjoy a higher return on your technology investment.

Business System Planning

Cadvabglobal's experienced consultants will help you to change your processes and systems efficiently and effectively. We will define the relevant processes and procedures, clarify gaps, issues, and opportunities presented by current-state of IT applications and architecture and develop a future-state along with a migration path and a road map for change that supports your business and provides business leader with confidence and measurable results.

Business intelligence and performance management

In today's fast-paced business climate, harnessing business intelligence is crucial to competitive advantage from reducing cost, enhancing efficiency, improving accountability to stakeholders, and maximizing productivity. Cadvabglobal consultants will provide your organization, with insight necessary to make better business decisions faster by using current application software and other technologies (BI tools) to gather, store, analyze and provide access to data, and present that data in a simple, useful manner.

Organizational Design

Good organizational design is about the organizational structure to support the strategic business plans and goals of an enterprise. Our aim is to ensure that given the mission and business strategy, senior consultants would take an integrated approach to organizational design by utilizing multiple lines of evidence to provide a fact-based assessment including governance, structure, key processes, and organizational culture. The expected result would be

a detailed picture of your strengths & weaknesses, providing the knowledge to help you improve compatibility and overall efficiency.

Project Management

Cadvabglobal's professional and PMI- certified consultants bring a proven approach to delivering successful business projects on behalf of our clients. Our Project Managers will consult with all parties involved in a project to ensure that co-ordinating the organizing, planning, scheduling, directing, controlling, monitoring and evaluating of prescribed activities as per stated objectives of the project, manufactured good or service are achieved on time and within budget.

Supply chain Management

Basically is the design, planning, execution, control and monitoring of supply chain activities with the objective of creating Net value, building a competitive infrastructure, leveraging world-wide logistics, synchronizing supply with demand and measuring performance globally. Cadvabglobal's experienced industry consultants will help you analyze your supply chain, improve efficiency, help reduce redundancies, and increase decision- making speed. We can rate supplier performance, develop vendor score cards, and provide the vision to reform or optimize your management processes.
